

Switch on your hiring.

An applicant tracking system for technical hiring teams in climatech, advanced materials, and Industry 4.0, with an AI fit score on every new candidate. Your team runs it. Your data stays yours.

THE WORKFLOW

Jobs, a pipeline board for every role from Sourced to Hired, notes, a green, yellow, or red call on each candidate, and your own searchable candidate pool. Plus a Chrome extension that saves a LinkedIn profile in one click.

AI FIT

Every new candidate gets a percentage fit, scored on the full resume against your must-haves and job description.

YOUR CAREERS PAGE

Your name and brand color. Publish a role and it is live. Every application lands straight in the pipeline.

YOUR TEAM

Admins, teammates, and hiring managers who see only their own roles. Compensation is a per-person permission. Reporting built in.

YOUR DATA

Privately hosted. Every workspace isolated and tested before each release. Never used to source for anyone else.

SET UP FOR YOU

Workspace, careers page, and team configured for you, with your open roles and candidates brought across.

NEED RECRUITING HELP TOO?

Filament ATS is software and does not include a recruiter. Specialist search is available separately from VoltForce, the firm that built Filament.

See it on **your own roles.**
