

The Talent Behind *Tomorrow.*

The specialist recruitment firm for climatech, advanced materials, and Industry 4.0.

PRE-SEED THROUGH SERIES C · UNITED STATES AND CANADA

WHO WE ARE

Powered. Sourced. *Produced.*

Three verticals. *One thesis.*

VoltForce is the specialist recruitment firm for the companies reshaping how the physical world is powered, sourced, and produced. Built on a single thesis: the talent moving across these three sectors is the talent we know best.

POWERED

Climatech

- Batteries & Energy Storage
- EVs & Charging Infrastructure
- Grid & Power Electronics
- Hydrogen & Clean Fuels

SOURCED

Materials

- Critical Minerals & Rare Earths
- Hydrometallurgy & Refining
- Advanced Alloys & Composites
- Semiconductors & Specialty Chemicals

PRODUCED

Industry 4.0

- Robotics & Automation
- Additive Manufacturing
- Factory Software & Digital Thread
- Reshored Production

PRE-SEED THROUGH SERIES C · UNITED STATES AND CANADA

THE DIFFERENCE

Why clients *use us*.

01

Vertical Specialization

Climatech, advanced materials, and Industry 4.0 are all we do, run by recruiters from inside those sectors.

- No generalist coverage, no diluted attention.
- Every search led by a specialist, not a generalist desk.
- Every search compounds our sector intelligence.

02

Radical Transparency

Every search runs on Filament, our platform. You see the same live pipeline we do, start to finish.

- The funnel you see is the funnel we see.
- Portal, sourcing, and applicant tracking in one system.
- Also available on its own, as Filament ATS.

03

Proven in the Sector

A track record inside these sectors, from first technical hires to VP and C-level leadership.

- Senior and leadership placements across our sectors.
- Experience standing up brand-new functions from zero.
- Confidential by default. Most searches never go public.

04

Speed to Shortlist

We start warm. Because we already work in these sectors, first names reach you in days, not weeks.

- We start from relationships, not a cold search.
- Priority focus, not a role waiting in a queue.
- Momentum from week one.

05

Stage-Aware Search

The first technical hire and a Series C bench are different problems. We calibrate to where you are.

- First-hire sequencing for early founders.
- Senior and leadership benches for growth-stage teams.
- Targets, comp, and messaging tuned to your round.

06

Senior Attention

You work directly with a specialist who runs your search end to end, from kickoff to close.

- One specialist point of contact, kickoff to close.
- The person who pitches you runs the search.
- Sector-fluent conversations at every step.

HOW WE ENGAGE

Three ways to work *with VoltForce.*

Filament powers every engagement, and it is available on its own. The structure flexes to fit your hiring window.

INCLUDES FILAMENT

TALENT PARTNER

Embedded & Fractional.

Embedded recruiting for teams in a ramp. The lowest cost per hire of any model, built for periods of volume. A quarterly retainer, six-month minimum, covers up to 5 active roles at a time, with Filament included.

- Candidate pipeline + portal access
- Client-branded careers page
- Sector-tuned AI matching
- Quarterly retainer

PRIORITY SEARCH

Strategic & Committed

Strategic, mutually committed (retained) engagement for mission-critical hires. Single or multi-role.

- 20% of base, less the \$7,500 retainer
- Deeper market mapping & strategic insight
- Embedded pipeline access through Filament
- Single or multi-role engagements

CONTINGENT

Per-Role Placement

Standard placement engagement for individual hires. Starts at 25% of base salary, invoiced on placement, backed by our replacement guarantee.

FOUNDER

Matt Anders, *Founder.*

FOUNDER AND PRINCIPAL RECRUITER

Matt founded VoltForce to be the specialist recruiter for the companies reshaping how the physical world is powered, sourced, and produced, and to build the premier network of senior specialist recruiters to serve them. Over a decade in technical recruitment across energy, battery, and advanced manufacturing.
